

Get Ahead on the Toughest Part D Measures

Part D adherence measures are notoriously difficult for MA-PD and PDP plans to achieve 4 or 5 Star Ratings due to the complex and individualized nature of medication management. Position your plan for success in attaining 4+ stars across even the most challenging measures including:

- Medication Adherence for Diabetes, Hypertension, and Cholesterol
- Statin Use in Persons with Diabetes (SUPD)
- Concurrent Use of Opioids and Benzodiazepines (COB)
- Polypharmacy Use of Multiple Anticholinergic Medications in Older Adults (POLY-ACH)
- MTM Program Completion Rate for CMR (to be reintroduced in MY2027)

With Arine's AI-powered platform, payors can:

- Dynamically identify members at risk of falling in or out of a measure
- Deliver proactive interventions directly tied to better outcomes
- Optimize care team resources for maximum efficiency

Get to 4+ stars on even the most challenging Part C and Part D Measures with Arine.

2027 Part D Measures (Measure Year 2025)

Part D Measure ^{1,2}	Weight	2025 MA-PD Average Star Rating ³
